

**CHIPTUNING FOR
EVERY VEHICLE**

MYCHIPTUNINGFILES-SERVICE POINT

Give yourself and your customers an upgrade. Become an official service point and be part of a winning team in the world of chiptuning. For more returns, also in your shop! More driving enjoyment and (even) more satisfied customers.

Fine-tuning engine management is no simple matter. As a specialist, you know that as well as anyone. But there is always room for improvement in the basis set-up from the factory. With MyChiptuningfiles, we do not have to make any concessions; instead of having to taking into account the wishes of the 'average user', we focus specifically on your customers. And you may also reap the benefits of that, as an official partner and service point for MyChiptuningfiles.

MAIK RIKSEN
CEO - MyChiptuningfiles

QUALITY SOFTWARE WORLD-CLASS, OFFERED LOCALLY

MyChiptuningfiles is a reliable partner for the delivery and service of high-quality chiptuning software for every brand and model, with both petrol and diesel engines. Our company operates at a global level, but collaborates with local service partners in a highly specialized way in the domain of technologically advanced tuning software and engine (re)mapping. Our worldwide team is driven, enthusiastic and dedicated to getting the best out of your customer's engine: the soul of every vehicle. Power, efficiency & soul: that is in our DNA and hopefully soon in the car that visits your shop.

THE SAME VEHICLE, BUT **BETTER, FASTER** AND **MORE FUEL-EFFICIENT**

The primary drive of our service is driving enjoyment. At the same time, we realize at MyChiptuningfiles that turning over the specs of your customer's vehicle is no small matter. That's why it is essential that we treat every vehicle with the greatest possible care, while the original character of the engine is preserved. We only make it better, more powerful and faster. In short, entirely aligned to the tastes of your customer. And you can help with that.

A nice side effect of an engine that runs as efficiently as possible is that the fuel combustion is optimal, which makes fuel consumption optimal as well. Users not only enjoy maximum power and torque, they also benefit from minimum fuel costs. That's what we call doing business responsibly!

✓ **SAFE, CUSTOMIZED CHIPTUNING**

SATISFIED CUSTOMERS AROUND THE WORLD

✓ **LIFETIME GUARANTEE**
ON THE CHIPTUNING FILES

✓ **SERVICE POINTS IN NL & BE**
THROUGHOUT THE NETHERLANDS & BELGIUM

YOUR CUSTOMER **SAVES FUEL** WITH **MORE POWER**

How does optimizing the engine management system work? We can set the parameters in the software such that more tractive power is generated at low(er) RPMs. As a result, the driver can shift sooner, without sacrificing power and speed. Shifting sooner saves fuel – as much as 8%! In addition, the extra power ensures that the engine runs more smoothly in the lower RPM zone and picks up more smoothly when the accelerator pedal is pressed toward the floor. This definitely benefits a sporty driving style and of course ensure a twinkle in your customer's eyes.

CHIPTUNING AS A TOOL WITH MALFUNCTIONS

What is often overlooked is that chiptuning can also prove quite supportive in cases of malfunctions in engine management. We regularly assist colleague dealers and garages with solutions when the standard factory software falls short. The files from MyChiptuningfiles then offer a solution: it is a safe and responsible way to resolve malfunctions in the ECU. That demonstrates the quality and reliability of our products, should you not yet be convinced of that...

MYCHIPTUNINGFILES: GUARANTEE A POWERFUL FORMULA

At MyChiptuningfiles, we believe in the power of collaborations between specialists in different areas to achieve the best result. All our service points started with the idea that a car performs optimally when the people behind it do as well. The software has been developed by the world's best-known tuning-software engineers. By combining this with the service and technical knowhow of your own experienced, professional technicians, we collectively offer the best of both worlds: a first-class product delivered by a reliable professional, you.

Your customers benefit from the best quality, both during and after performing the engine management software upgrade. In addition, the functioning of all our chiptuning files is thoroughly checked on the power test bench, so that the promised quality is not only a given but also demonstrably guaranteed.

EVERYTHING YOU NEED TO GET STARTED WITH CHIPTUNING

YOUR START IN CHIPTUNING

Everything to get started. Plus support to grow.
